Dear my host family,

Hello! My name is Eisuke. First, thank you for considering me as a part of your family. This letter is written about why I want to live abroad and my usual life.

My family consists of my father, mother, older brother, older sister and me. My father is a company employee and my mother is a housewife. My brother is a university student and the oldest of my siblings. My sister is a high school student and has studied abroad in Belgium. She is one of the reasons why I decided to study abroad. I am the youngest of my siblings. My hobby is watching basketball. I have played basketball for four years. I like watching the NBA. My favorite team is the Lakers and My favorite player is LeBron James. Compared to other sports, there are more points scored and the pace of the game is fast, so in addition to tactics, you can also see the other-worldly physical. I also like listening to music. I usually listen to J-pop and K-POP, but I sometimes listen to Western music too. I am interested in famous Swedish music. My favorite artists are Babymonster who are girls' idol. They are good at dancing and singing. I always listen to their songs. Although I'm not very good at it, I have studied Korean a little. In the future, I hope to be able to speak many different languages and be able to communicate with many different people.

In junior high school, I was working on filming the graduation video. I had to think hard about how to preserve everyone's memories, and I made the video with my friends. I had to lead the group and organize a schedule to fit everyone's schedules, so I think I gained management skills and leadership skills. I was on the cheer squad at the sports festivals for the past two years. At the last sport festivals, I did it without any friends, but because I didn't know many people, I was able to interact with new people and make new acquaintances. In this way, I have actively participated in things and gained learning and experience.

I've been to Dubai, France, Italy, and Belgium. In those countries, I was impressed by the beauty of the buildings. And the most memorable part of those trips for me was visiting the Arc de Triomphe in France and the Statue of David in Italy. About the Arc de Triomphe, the presence of the surrounding roads was amazing, and at night the streets are lit up and are very beautiful. And I was impressed with Paris' beautiful cityscape, the well-organized transportation system, and the fact that it is possible to get around all the tourist attraction in one go. In Italy, there were big differences between cities, which made traveling exciting. For example, Milan had many buildings in the city and the streetscape was modern, but Rome and Florence used many old buildings, and the buildings were generally tall and made of brick.

I decided to participate in this program because I have always been interested in living abroad and the nature and cityscapes of other countries.

I think I can convey the nerdy aspects of Japanese culture. And I think we can have fun together through our cultural differences.

Thank you for considering,  
Eisuke
