Hello dear host family,

My name is Moritz, I'm 16 years old, and I live in northern Germany with my mom and younger brother. I'm really looking forward to meeting you and spending a year as part of your family. For the past several years, I've been very interested in Sweden. I admire everything about the country, from its language to its nature and culture. I've been learning Swedish for five years and can't wait to finally use my language skills in everyday life. My family has always had a special connection to Sweden. We've traveled there many times, and it's always been my dream to learn more about the people and experience life there for a longer time. I attend a gymnasium with a focus on music, and I am in the 10th grade. Music plays a big role in my life. I play the violin and enjoy listening to many different types of music. A year ago, I started dancing and now I'm really passionate about standard and Latin dances. I also enjoy spending time outdoors, and I love nature. It's one of the things I look forward to the most when I think about Sweden – spending time in nature and appreciating its beauty. I am a calm and open person who enjoys discovering new things. I value family life and believe that being part of a supportive, loving family is very important. I believe in harmony and always try to find peaceful solutions in any situation. At home, family means a lot to me, and I enjoy spending quality time with my family. I am very excited about the chance to become part of your family and experience family life in Sweden. In my free time, I like spending time with friends, but I also enjoy quiet moments where I can relax. I've been used to managing my responsibilities at home for a while. I live in a three-person household with my mom and younger brother, and we all work together to keep things running smoothly. I share a room with my two years younger brother and we get along really well. We have a strong and close relationship. My mom has a partner who has been part of our lives for several years now. Even though he doesn't live with us, he joins us for vacations and is often present in our daily activities. I have a very good relationship with him, and I can always talk to him if I need advice or support. I'm used to doing my part at home and taking care of things when needed. It has helped me become a bit more independent. I help with chores, cleaning, shopping, gardening, laundry and anything else that needs to be done around the house. I'm excited to bring this mindset with me and contribute to your family, whether by helping out around the house or being there when you need support. I'm really excited to meet new people in Sweden and make new friends. I am open-minded, tolerant, and always eager to learn from others. I also love humor and enjoy making people laugh, whether with my friends, my family, or even with people I just met. It's important to me that humor brings people together. I think that in any situation it's good to keep things light and enjoy life. In serious situations, it can help to stay positive. At home, we enjoy taking small trips, visiting new places, going on boat tours, or attending concerts. I believe that spending time together as a family is important, and I'm looking forward to having these kinds of experiences in Sweden. I'm also someone who is very open and easy to talk to. I think it's important to have open communication in a family and I'm always ready to talk about anything that's important. I'm used to talking to people of all ages and enjoy learning from their stories and experiences. Thank you so much for giving me this amazing opportunity. I'm truly grateful to have the chance to live in Sweden and learn about its culture. I'm excited to share my life with you and have an unforgettable time together. I'm sure it's going to be a life-changing experience and help me grow.

With warm regards,

Moritz
