Hello,

my name is Pietro, I live in a family of five with my parents Roberto and Francesca and my little sisters Caterina and Maddalena, we really enjoy spending time together in occasions such as live vacations or simply during dinner. Living in a quite big family taught me the importance of sharing and adapting to different personalities. My typical day is waking up kind of early because I like to take my time in the morning, having breakfast and then walking to school with a friend of mine. When I return home I often have lunch by myself since my siblings and parents come back home at different times and then I study, do my homeworks, play the guitar and sometimes watch videos on youtube about topics I like such as informatics or videogames wich I also sometimes play, even though lately I haven't been playing them a lot. In the afternoon now I am also starting to go to the gym. In the evening I have dinner with my family and after dinner I watch TV with them or sometimes go back to studying.

During weekends, I often meet friends to hang out or play basketball I have also been a scout for many years, which has helped me develop independence.

I have been playing the guitar for about 4 years now and I also like music in general, it fascinates me. I also really like anything related to informatics and Artificial Intelligence, this curiosity extends to my approach to learning; I love understanding how things work. I'm looking forward for this program because I see it as an opportunity for personal growth. I am ready to step out of my comfort zone. Even though I am sure that it will be challenging, I believe that it will lead me to learn many things that I will use for my whole life and gain independence while immersing myself in a whole different culture and improving my language skills.

What I hope to bring to your family is my enthusiasm for learning, willingness to participate in family activities and openness to new experiences. I am a helpful person who is polite and respectful of rules, I am ready to participate in your family life, helping with daily tasks and sharing my different perspective.

Thank you in advance.

Pietro
